Plant technology	ATB Umwelttechnologien GmbH, Porta Westfalica/Germany
Plant type	AQUAmax® XL1-B1.0/6.0
Plant capacity/size	SBR Plant: 80 PT / 12 m ³ /d
Commissioning	2016
Project description	Since there were almost no work- ing sewage treatment plants on the Galapagos Islands, an SBR system for the purification of the hotel sewage was financed and installed via this PPP project. This pilot plant serves as a reference for follow-up projects to improve the desolate sewage situation on the Galapagos Islands and to pro- tect this unique natural reserve.
